Worker Vaccination Status – Record of Preference

Name of person supported: _____

Family member/Nominee: _____

Coordinator/Support Manager: _____

Date: __/__/__

We have a duty of care to each person we support and to keep people safe.

An important part of this is to help to prevent the spread of infectious diseases through our support services. We follow the Australian Government's advice for the actions to take.

Immunisation can help to reduce spread of infectious diseases. Here we are referring to both the flu vaccine and the new COVID vaccine.

Neither vaccine is currently mandatory, and everyone can make a personal choice, though in ____ support workers are/are not mandated to be vaccinated against Covid19.

However, we will support the wishes of each person and their family about whether they require their workers to be vaccinated for flu, or for COVID, as part of their ongoing support.

We will also help you to recruit a new worker who is prepared to be vaccinated.

Given this, can you please let me know now, or as soon as possible:

	Y/No	Comments
1. Will you <u>require all</u> your workers/services staff to be vaccinated for the flu as part of their continued support?		
2. Will you <u>require all</u> your workers to be vaccinated for COVID as part of their continued support?		
3. If the worker/s have a <u>verified medical condition</u> preventing them from being vaccinated, will you be happy for them to continue working with other measures in place eg wearing masks for personal care etc?		
4. If it is the worker/s <u>personal choice</u> to not be vaccinated, will you be happy for them to continue working with other measures in place eg wearing masks for personal care etc?
